Evergreen Indexing

Introductory Note

This index to The University of Toledo Alumni Magazine covers content from Fall 2000 (volume 47, number 1) through Fall 2009 (volume 57, number 1). The index includes all articles of half a page or more in extent including photos and captions. Headings attempt to cover both subjects as well as proper names of people, departments, programs, buildings, etc. The index does not include very brief notes, announcements of services or products, or listings in the *Class Notes* or *In memoriam* sections of the Magazine.

The Index is divided into three sections:

- Authors - lists contents by names of the writers of the articles. Note that much content is not bylined so this is not a comprehensive list of articles.
- Titles – includes every titled article in a single alphabetic list
- Names and Subjects – provides a detailed summary of all the proper names and subjects mentioned in the indexed articles.
